DOORS AND WINDOWS

The Origin Residential Door

Introducing the Origin Residential Door...

The first clue to your home's character

Unlock your home's potential with the Origin Residential Door, where security and aesthetics are superbly combined.

Innovation is at the forefront of everything we do - and the Origin Residential Door is no exception. It's precision driven and expertly engineered - a real thing of beauty.

Manufactured with a high grade aluminium in our Buckinghamshire based factory, it's available in a vast range of striking panels, designs and styles, enabling you to create your desired look with ease... Because first impressions matter.

An entranceway to be proud of...

While an external door is an essential part of any home or building - providing security and thermal insulation - Origin believes that it's much more than just an entranceway. It's a statement piece - it's as unique and individual as you, as it offers the first glimpse of your home's style and character.

Completely bespoke, it's tailored to your personal, practical and stylistic requirements. No matter your taste, there's an Origin Door out there for you. So whether it be for a new-build, an existing property, a modern apartment or even a garage, our doors are guaranteed to make an impact and can turn your entranceway into a truly unique focal point.

Here at Origin, our vision is to *transform the way families enjoy their home – from inside to out.*

Panel Option: SE 07, Door Colour: 7016M, Frame Colour: 7016M

Bespoke to you...

your door, your way

Your home, your doors – with all the little details just as you want them.

We understand that no two doors are the same, which is why our comprehensive range of highly-insulated and ultra-secure doors are available in a variety of styles, colours, accessories and finishes to suit all tastes.

From the sizing and colour scheme, through to the panel style and hardware choices, you're in control.

Create your dream door now with our new online door configurator.

To create your perfect Origin Residential Door, follow the steps below and let us take care of the rest.

Panel choices...

Make a statement

From modern to traditional, there's a panel for every taste

External doors can make a huge impact on the kerb-appeal of a home – and with 35 innovative and stylish panel choices to choose from, Origin allows you to design a perfect statement door that complements your existing architecture and reflects your individual style.

The panel itself will feature a Thermimax core, and from there, it's finished with aluminium inner and outer layers, so you can be assured of not only a thermally efficient performance, but a secure one too.

Perhaps you want a panel with lots of glass to create a grand entranceway that floods your

hallway with natural light, or maybe you'd prefer a more traditional understated look for more privacy? No matter your need or taste, there's a suitable panel that will offer the perfect aesthetic fit.

For example, choose from timeless and classic styles that never go out of fashion. Or, if you're after an ultra-modern feel, our sleek and stylish panels can provide a touch of contemporary sophistication to your exterior.

Mid-rail option

Helping further broaden your design possibilities, Origin offers the option of specifying a fully glazed door or having a mid-rail pre-installed. Elegantly executed, the mid-rail is fixed horizontally and is available in two options - either a 60:40 or 50:50 split. Perfect for porches, they can either accommodate glass, or a panel can be installed in the bottom section for additional privacy.

Panel Option: TR 02, Door Colour: 7032M, Frame Colour: 7032M

Panel options...

Contemporary – Sleek designs with a contemporary twist

Traditional – A modern take on traditional style

Geometric – Striking designs with geometric patterns

Statement – Bold panels for statement exteriors

Seamless – Simplicity and style seamlessly combined

Depending on the panel specified, the available glass or hardware options may differ. Glass options include matt, clear and reflective.

Key

-  Letterbox available
-  Available with or without glazing
-  Knocker available
-  Available on a 1-week lead time

*studs (as shown on TR02 & 04) are an optional extra

**Our popular panels are available on a 1-week lead time when ordered in 7015M, 7016M, 7021M, 9005M, 9007M, 9910G or in a dual colour of 9910G in and 7016M out.

Inspired by colour...

set the tone of your home

Whatever your colour preference, with over 150 different RAL shades to choose from, you can be sure to find one that suits your taste – no matter how subtle or flamboyant it may be.

Ranging from bright primary shades through to candy pastels and deeper earthy tones, the extensive colour palette is guaranteed to offer inspiration to homeowners and interior designers alike. Of course, the usual favourites of black, white and all of the popular metallic shades in between are also on offer.

Additionally, different colours can be selected on the frame, sash and the panel, meaning that it's easy to create your own unique look.

A dual colour option is also available, so your chosen exterior colour(s) can complement the building style, while the interior can blend in or contrast with your internal colour scheme.

Don't be afraid to go for a bold hue that makes your entranceway pop. Or, for a more subtle look, a more conservative colour will complement most interiors. Popular combinations include a vibrant red or blue door paired with white frame for a friendly high-contrast aesthetic. Or for a fresh seaside feel, a light and dark blue juxtaposition works wonderfully. And if it's a classic contrast you're seeking, nothing beats a timeless black and white pairing.

For a truly traditional touch, we also offer authentically styled woodgrain effects, which offer all of the benefits of aluminium with none of the painting requirements that wood often needs, providing the best of both worlds.

Many of our RAL colours also come with the option of a matt, satin or gloss finish, giving you plenty of choice to make a great first impression.

Choose your panel colour

Choose your sash colour

Choose your frame colour

Panel Option: GE 04
Door Colour: 6026M
Frame Colour: 6026M

Popular colours...

Your personalisation options are virtually limitless with Origin. So much so that you're able to colour coordinate Q-Ion seals and various gaskets to the frame or panel. To the right demonstrates the most popular colours and to assist with this, we've outlined the Q-Ion colours that they often go with.

If you select a popular panel in one of these colours, you'll benefit from receiving your doors on a 1-week lead time.

Popular Dual Colour:

9910G (Hipca White) in, 7016M (Anthracite Grey) out

Even the gasket & Q-Ion seal colour is your choice...

| | Door Colour | Recommended Q-Ion Colour |
|----|-----------------|--------------------------|
| A. | 7015M and 9007M | Slate Grey |
| B. | 7016M | Anthracite Grey |
| C. | 9005M and 7021M | Black |
| D. | 9910G | White |

Visit your local showroom or contact Origin directly for physical samples.

Accentuate your architecture...

It's the little things
that count...

While functionality and security come as standard with every Origin product, the finer details are never overlooked. In fact, it's the nuances and attention to detail that set us apart. From premium quality handles and door pulls, to unique door-knockers, spyholes and letterboxes – our exclusive suite of hardware components perfectly complement your door, adding interest and accentuating your chosen architectural style.

Panel Option: SE 04
Door Colour: 7016M
Frame Colour: 7016M

Getting a handle on things...

The handles of an Origin Residential Door are the perfect finishing touch to the exquisitely designed system.

Choose from a selection of elegant handle styles that have been designed and manufactured with the same level of care and dedication as every other component.

With the offset handle, you can choose to have it placed on either the panel itself or on the door sash, whilst the straight bar and bow bar handles will sit on the panel.*

In addition to striking the optimum balance between superior strength and sleek design, our handles are exhaustively cycle-tested to ensure they mirror the flawless functionality of the doors themselves and will, therefore, stand the test of time.

*Handle options and positions may vary dependent on the panel chosen.

Cylinder Pull

A cylinder pull can also be specified. Its stylish design sits round the barrel and is used to aid with opening or closing the door.

Brushed Stainless Steel

Knock knock...

There are a number of stylish accessories that you can add to your Origin Residential Door, including letterboxes, knockers with spyholes and security bar restrictors, to ensure your practical requirements are met.

Origin offer an exclusive suite of hardware to complement your door

The Urn and Slimline knockers are able to be selected in the following colours: black, white, chrome and gold. There is also a stainless steel option available when choosing the Slimline knocker.

For a more classic home or property, opt for the Affinity Urn knocker, a timeless design that combines modern practicality while retaining traditional character. If a contemporary and streamlined look is more your style, our Slimline knocker is the perfect accompaniment. Both styles can be fitted with an integrated spyhole and leave no unsightly bolts on the inside of your door.

The Origin Residential Door also offers the option of a security restrictor. This is designed to limit the door opening prior to visitors entering - it's easy to apply and release.

Panel Option: SE 04
Door Colour: 7015M

Unsurpassed security...

No matter how aesthetically pleasing an external door is, its main function is to provide your home with security, which is why the Origin Residential Door has been designed with heightened security in mind and meets PAS24:2016 requirements as well as the police backed Secured by Design accreditation.

All of our doors are equipped with a multi-point locking system. There are 2 different locking mechanisms able to be specified, and these are determined by the handle choice.

For doors with a bar handle or cylinder pull, a 5-point automatic locking system with key only access will be supplied. This lock allows the user to simply shut the door and turn the key without the need to lift the handle first. For those who opt for the Yale security handle or choose one from our premium stainless steel range, then these will be supplied with our unique 8-point locking mechanism. When selected as a French door, it will come with a finger bolt to lock the slave door in place.

Industry-leading 8-point locking system

Combining a sophisticated style and elegance with the very latest in high performance, the Origin Residential Door is guaranteed to keep a home safe and secure from intruders. Chamfered 20mm linear bolts offer a smoother operation when engaging the lock, as well as giving maximum compression for increased weather durability.

Add deep throw 25mm security hooks - the deepest engagement available on the market today - and the lock delivers the best in both security and weatherproofing.

See page 23 and 24 for more information on our PAS 24:2016 and Secured by Design accreditations.

The locking barrel

Here at Origin, we're proud of the steps we have taken to design a front door that is not only stylish, but one that offers an ultra-secure performance in protecting your home and family.

Special attention and innovation has been engineered at every level, with no smaller intricate detail being overlooked.

That's why our Residential Doors come with a 3-Star Diamond British Kite Marked barrel as standard. The barrel is proven to protect against snapping, picking, drilling and bumping, offering a defence that is second to none.

Additional security features

As standard, the Origin Residential Door comes with specifically designed hinges, which have been engineered to withstand attack to offer little opportunity for even the most determined intruder. Without compromising on aesthetics, these hinges can be colour coordinated in any RAL or are available in a stainless steel finish. All of this, on top of the innately robust and strong aluminium profile and panel composition, makes for an ultra-secure system.

Seamless access...

For easy access and protection against the elements, our expertly crafted Origin Residential Door offers 3 thermally broken threshold options for a minimalistic transition between the inside and out.

Sharing the same great technology as the Origin Bi-fold Door, the weathered and non-weathered threshold options are available, so you can pick the right option for your home depending on how exposed to the elements it will be.

Our cleverly engineered weathered threshold ensures your home is kept watertight and weather protected, no matter what the elements throw at you.

The non-weathered options offer a level floor finish and allow for a seamless transition between the inside and out. They are largely recommended for internal usage, so are an ideal option for flats, doors enclosed in a front porch or doors that aren't fully exposed to the weather.

Alternatively, you can opt for the specifically designed mobility threshold, which stands at just 20mm when the door is open, thus allowing suitable access for wheelchair use.

The strength of high-grade aluminium...

Style and slim sightlines are nothing without strength and security – and our aluminium provides both; bringing benefits you can see as well as those you can't.

As with all things Origin, the aluminium we use is far from average. Comprised of only prime, premium-grade billets, it's exceptionally strong, yet weights 67% less than steel. And because our aluminium isn't made up of re-melted scraps, it means we have superior control over its formulation, allowing a better overall finish to be achieved.

In terms of the benefits you can't see – aluminium's innate strength makes the doors physically secure, energy efficient and highly durable. It's also resilient to the elements, so the frames won't flex or warp in varying weather conditions. Additionally, another reason for aluminium being Origin's material of choice is because it's infinitely recyclable. Read more about our environmental accreditations on page 25.

As for the benefits you can see – you only need to look and feel an Origin Door to understand. The stunning profile is finished with the highest-grade powder coating available, resulting in a robust yet smooth to the touch surface.

It's the combined quality, strength and dependability that aluminium brings that allows Origin to provide such long guarantees.

See page 25 for more information on our environmental accreditations.

Designed to endure...

Exclusively designed, developed and manufactured by us in our state-of-the-art UK factory, the Origin Residential Door has been engineered to perform and built to last.

Our in-house research and development team works tirelessly to make sure that every component, manufacturing technique and feature (such as security, thermal efficiency and safety) is optimised.

Needless to say, our attention to detail doesn't stop there. At each stage of the manufacturing process, our doors undergo rigorous quality testing to ensure they leave the advanced Origin factory at a consistently unparalleled standard.

It's this continual quest for perfection, combined with uncompromising quality control and precision engineering that makes the quality of our doors very rare – putting Origin at the forefront of design and manufacturing excellence.

So, when you choose an Origin Door, you're guaranteed something special. In fact, we're so sure of our craftsmanship, that we offer an industry-leading guarantee of up to 20-years – giving you ultimate peace of mind.*

**Guarantee based on location of where the doors will be installed.
See page 22 for more information on our quality accreditations.*

Panel Option: SE 04
Door Colour: 3002M
Frame Colour: 3002M

Thermal efficiency...

Combining style with thermal performance, the Origin Residential Door has been expertly engineered to optimise energy efficiency, security and aesthetic appeal.

Whether you choose a solid panel or opt for a part glazed door, you can be assured of thermal efficiency and comfort in your home all year round for reduced energy bills.

The Origin Residential Door frame and sash features an advanced polyamide break to limit heat transfer from the

interior to the exterior, and the panel is composed of inner and outer layers of aluminium with an ultra-insulating Thermimax core.

Additionally, the Origin Residential Door makes use of some of the most sophisticated weathertight seals to keep the elements out, come rain or shine.

It's elegance without compromise.

Safety first...

Few things are more important than safety in your home, which is why the Origin Residential Door has been designed with this in mind without compromising on kerb-appeal. The doors boast finger safe gaskets, as well as sophisticated threshold options, which minimise boundaries, so are ideal for wheelchair use.

Optional safety add-ons are also available, such as our security bar door restrictors and knockers with integrated spyholes. And because of the stringent quality control Origin has over all elements, including component performance tests, training regimes and quality control at each stage of the manufacturing process, it means that stress, worry and concern are a thing of the past.

Low maintenance...

An inspiration in both design and function, the Origin Residential Door utilises high-quality materials to offer architectural flexibility, unsurpassed craftsmanship and extreme durability.

Unlike timber or uPVC, aluminium is resilient to the elements, so our frames are resilient to flexing or warping, meaning that their alignment will remain unaffected over their lifetime.

Its impeccable powder coated finish doesn't absorb water or attract contaminants, so removes the need for periodic painting and maintenance.* Its superior finish also protects your door from colour fading, ensuring it keeps its pristine looks for years to come.

**More routine maintenance will be required in certain areas. See our terms and conditions for details.*

With Origin, the only limit is your imagination...

The advanced manufacturing techniques that Origin employs allow the Origin Residential Door to be tailor-made in different sizes, designs and colours. From single doors through to grand entrance ways, we've got it covered.

Sharing a similar style profile to our bi-fold door and window system, the Origin Residential Door ensures a whole house harmonious style.

Front Door

Available as a single or a French door, Origin's panel choices are guaranteed to give your home's entranceway an injection of character. Whether it be bold, subtle, traditional or modern, the choice is yours.

Garage Door

For the ultimate front of house unity, the Origin Residential Door can also be used as a garage door. When selected as a garage door, it can be specified with no threshold.

Panel Option: SE 07
Door Colour: 7016M
Frame Colour: 7016M

Configurations to suit any aperture

Whether you go for a single door or a timeless French Door, matching decorative panels can also be added as sidelights, or Origin Windows can be incorporated to the side or top, allowing us to provide a solution that can fit into an aperture of any size.

Not only will adding Origin Windows let in an abundance of light, but they also offer a completely cohesive look for a visually stunning effect.

Doors can also be manufactured to open in or out, ensuring they meet your spatial as well as stylistic requirements.

Our Accreditations...

At Origin, we pride ourselves on providing best quality products backed by best levels of service and efficiency. Put simply, our aim is to continuously learn, evolve and improve.

We are well known for having rigorously high standards in everything that we do. We're also known for innovation, but we never want to settle: if there's a way that we could do something better, we will find it.

This ethos has been instilled throughout Origin. Whether it's a process, product offering or even the company's sustainability, we have created a culture that encourages continuous improvement.

To demonstrate our commitment and as a way of measuring our performance, we work towards gaining certain prestigious accreditations. Our achievements show a strong moral and ethical intent in how we operate and how we try to do things the best way, not because we are told to do so, but because we think it is the right thing to do.

Here are some of the ways in which we continuously aspire and strive to be better.

ISO 9001 – Quality Management...

ISO 9001 is an international standard that assesses a company's quality management system. Having first achieved it in 2013, the fact that we are still certified means that we have a track record of consistently providing products and services that meet both customer and regulatory requirements.

It's something that we take very seriously and its influence is integrated into every process. Key areas of this include:

Product quality – to ensure a product's overall manufacture is flawless, we have checks in place to guarantee you the best quality. A few examples are:

- Supply chain – an inspection at the point of delivery and before going into manufacturing. If anything is spotted, it's documented and raised with the supplier.
- Production – there are quality checks at every station, not only to look over the previous person's work, but to review the quality of the overall build.
- Equipment – a robust maintenance schedule for machinery and equipment ensures consistency.
- Pre-delivery – before products are packaged and loaded ready for delivery, there's another thorough check to ensure nothing's happened whilst being moved from station to station.

Feedback – as part of our mission to always innovate, whether it's from internal or external stakeholders, feedback is imperative. We are very proactive at bringing this type of information back into the business and learning, as it gives us an opportunity to improve.

Training and development for our employees – meaning we're better at understanding the good, the bad, and what we can do better.

FS 584084

Secured by Design...

Secured by Design (SBD) is a national, police-backed standard, associated with security and levels of performance for weather, operation and quality on domestic properties. The flagship UK police initiative was originally introduced to help 'design out' crime through the use of high-quality, innovative products and market-leading processes.

It recognises that our doors and windows have not only been tested to the required security standards, but that they also adhere to the rigorous test standards required by the police.

This independent certification involves initial testing of the products and regular re-tests, as well as inspections of our manufacturing and production facilities, to ensure the correct processes are maintained constantly over time, providing more secure and reliable products.

In order to be able to apply, we first needed to achieve:

1. PAS 24:2016 (Enhanced Security)
2. BS EN 6375 Part 1 (Weathertightness)
3. BS EN 6375 Part 2 (Operational and Strength Characteristics)
4. BS EN 6375 Part 3 (Basic Security)
5. ISO 9001 (Quality Management)

We're proud to say that our products passed every one and SBD, so you can feel secure by choosing Origin.

Panel Option: CO 01
Door Colour: 6021M
Frame Colour: 6021M

PAS 24:2016...

This is your guarantee that the door sets and windows that we manufacture deliver the right level of security for the buildings they are intended to be part of.

Like most British Standards, PAS 24:2016 is a minimum standard, and it is either a pass or fail test. There isn't a performance scale for those that are more or less secure, so some of the products that pass will be stronger than the minimum requirement. That's why we have become Secured by Design accredited. Because it's a voluntary scheme, we feel it demonstrates our commitment to the security and overall performance of our products.

PAS 24

This is your guarantee that the door sets and windows that we manufacture deliver the right level of security...

Panel Option: SE 04
Door Colour: 7016M
Frame Colour: 7016M

Origin Doors and Windows are also on display throughout.

ISO 14001 – Environmental Management...

Now more than ever, we need to be aware of the impact our operations may have on our environment; the legal obligations we must adhere to, and ensuring we are doing things the right way.

The internationally renowned ISO 14001 accreditation measures the environmental management system that we have in place. It's a subject that's very close to our hearts, which is why working towards this standard was an easy decision.

We care about the resources we use for our products – where they come from and where they end up. To add to this, we aim to be zero waste to landfill and have already put into place many positive changes to make this happen. We want our customers to buy from us with a clear conscience and feel that ISO 14001 can prove that Origin is taking responsibility, acting ethically, legally and exercising best practice in all that we do. Our environmental management system covers:

- Waste management and energy targets – to reduce our consumption and impact on the environment. Helpful hints, tips and reminders are prompted to all staff regularly, so that they can join us in our goal and see how small changes to their work practices can have a big impact.

- Product design and lifecycle – recyclability and sustainability are a design priority for us.
- Supply chain – choosing suppliers that are aligned with our ethos and vision. This is applicable not only when bringing on new suppliers, but also working with existing ones to better their carbon footprint – whether that's minimising packaging, reusing or even our drivers picking up the materials on their routes, rather than a supplier sending their own fleet, we are constantly reviewing how we can improve.

Practical information...

The Manufacturer

In the fenestration industry, the brand of the product is rarely the company that manufactures it. A major consequence of this method means that quality can vary drastically between one manufacturer and another, and there is therefore no guarantee that the doors produced are to the parent company's specification and quality standards.

This is where Origin is different. Unlike the rest, Origin keeps full control of the product from start to finish.

The Next Step...

Once you're set on turning your house into an Origin Home through the installation of award-winning doors and windows, contact Origin via the details on the reverse.

From here, our expert customer service team will be able to answer any additional questions you may have, and can direct you to your nearest Origin partner.

Our nationwide network of partners are carefully selected and extensively trained to ensure you receive the greatest quality product that's backed by a reliable and helpful service.

Visit your nearest showroom to view the Origin Home range. Your selected Origin partner will be the one undertaking your installation, so they will be best placed to discuss your project and costs with.

Origin is the UK's leading manufacturer of aluminium architectural solutions.

Now award-winning and operating internationally, Origin began in 2001 as a family company dedicated to the design, creation and manufacture of the UK's best quality doors, backed by uncompromising levels of service.

Cousins, Neil Ginger and Victoria Brocklesby, have since worked relentlessly to perfect the design and functionality of bi-folding doors, and to create and maintain the highly respected reputation for quality and service that they have today, while expanding the range to include Residential Doors, Sliding Doors and Windows.

As the business has continued to grow and diversify, the foundations of family ethos, pride and ownership in all stages of production firmly remain.
