DOORS AND WINDOWS

Residential Door

Key features and benefits...

10 panel options...

Our panel collections offer an array of styles and designs to ensure we have a panel to suit every home, whether it be traditional or modern in style. We also have five panels that are available in as little as 1-week when ordered in one of our seven popular colours.

Accentuate your architecture...

There are a number of stylish accessories that you can add to the Origin Residential Door including letterboxes, knockers and spyholes, to ensure all practical requirements are met. The spyholes can be integrated in the knockers, or can be specified as standalone options.

Up to a 20-year guarantee...

Exclusively designed, developed and manufactured by us in our state-of- the-art UK factory, the Origin Residential Door has been engineered to perform and built to last. We're so sure of our craftsmanship that we offer an industry-leading guarantee of up to 20-years on parts.*

*Guarantee based on location of where the doors will be installed.

Ultra-secure...

The Origin Residential Door comes with our unique and specially designed multi-point lock for superior security. Additionally, it is equipped with four hinges that have been engineered to withstand attack, making it an ultra-secure system which can achieve PAS 24:2016 and Secured by Design status.

Unrivalled quality...

As with all things Origin, the aluminium we use is far from average. Comprised of only prime, premium-grade billets, it's exceptionally strong, yet weighs 67% less than steel.

Inspired by colour...

No matter how subtle or flamboyant your taste may be, Origin can manufacture the Origin Residential Door in a colour to suit. With over 150 different colours to choose from, plus the added option of being able to choose a different colour for the frame, sash or panel, it means you have the freedom to be as imaginative as you want.

Front of house unity...

Sharing a similar style profile to our door and window systems, the Origin Residential Door ensures a whole house harmonious style. To amplify this, it can also be used as a garage door. In this instance, it can be specified with no threshold for ease of access.

Thermal efficiency...

The Origin Residential Door has been expertly engineered to optimise energy efficiency, security and aesthetic appeal. Whether you choose a solid panel, a fully or part-glazed door, you can be assured of thermally efficient doors that will help reduce energy bills.

Your door, made your way...

On top of the panel options, our Residential Door offers even more design possibilities, as the following are also available:

- A fully glazed door
- A mid-rail to separate the top and bottom sections
- A mid-rail with a panel at the top or bottom for additional privacy
