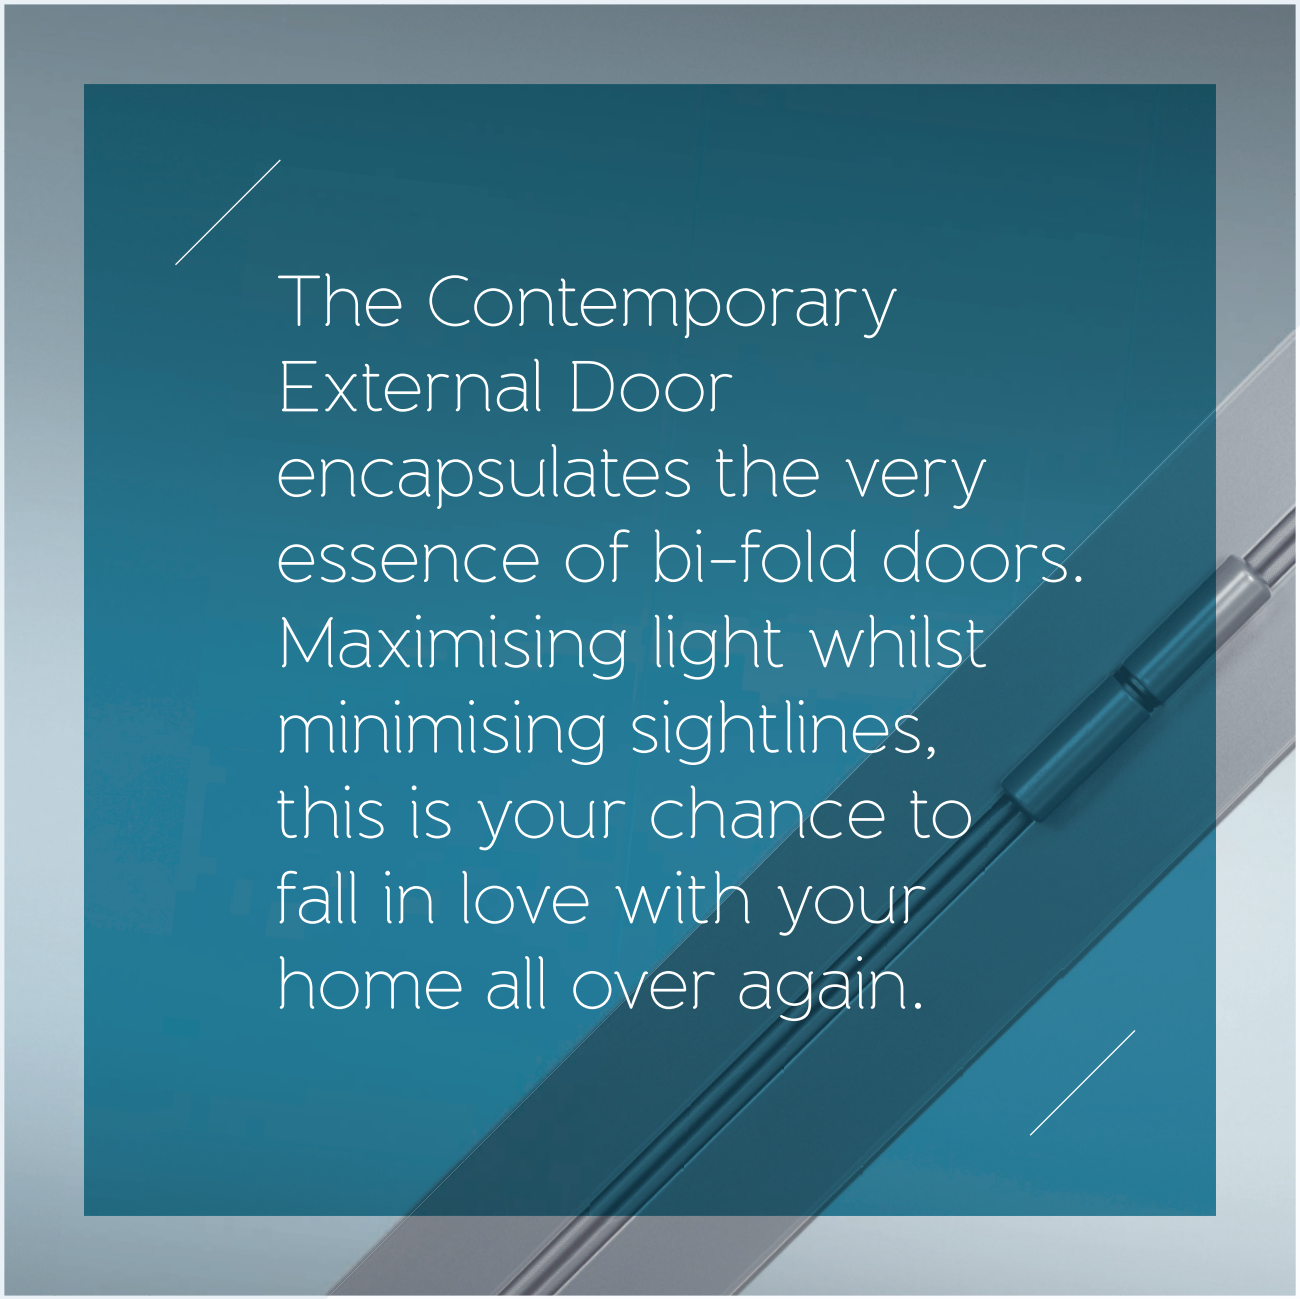
DOORS AND WINDOWS

THE CONTEMPORARY EXTERNAL DOOR



The Contemporary
External Door
encapsulates the very
essence of bi-fold doors.
Maximising light whilst
minimising sightlines,
this is your chance to
fall in love with your
home all over again.

Contemporary, yet timeless...

The bi-fold door was our very first product. Since launching over 20-years ago, we've invested extensively in our strive for perfection. Meticulously designing, engineering and innovating, we've worked relentlessly to ensure the bi-fold keeps its well-earned place at the heart of the home.

The Contemporary External Door is the result of pushing the boundaries of a well-known and loved door system into a sphere of incomparable performance and aesthetics. Simply ahead of the game, it comes with the promise of meeting future building regulations, and with sightlines of just 36mm, it's an opportunity to fall in love with less.

PRODUCT DISPLAYED: OB-36[+]

A new way of living...

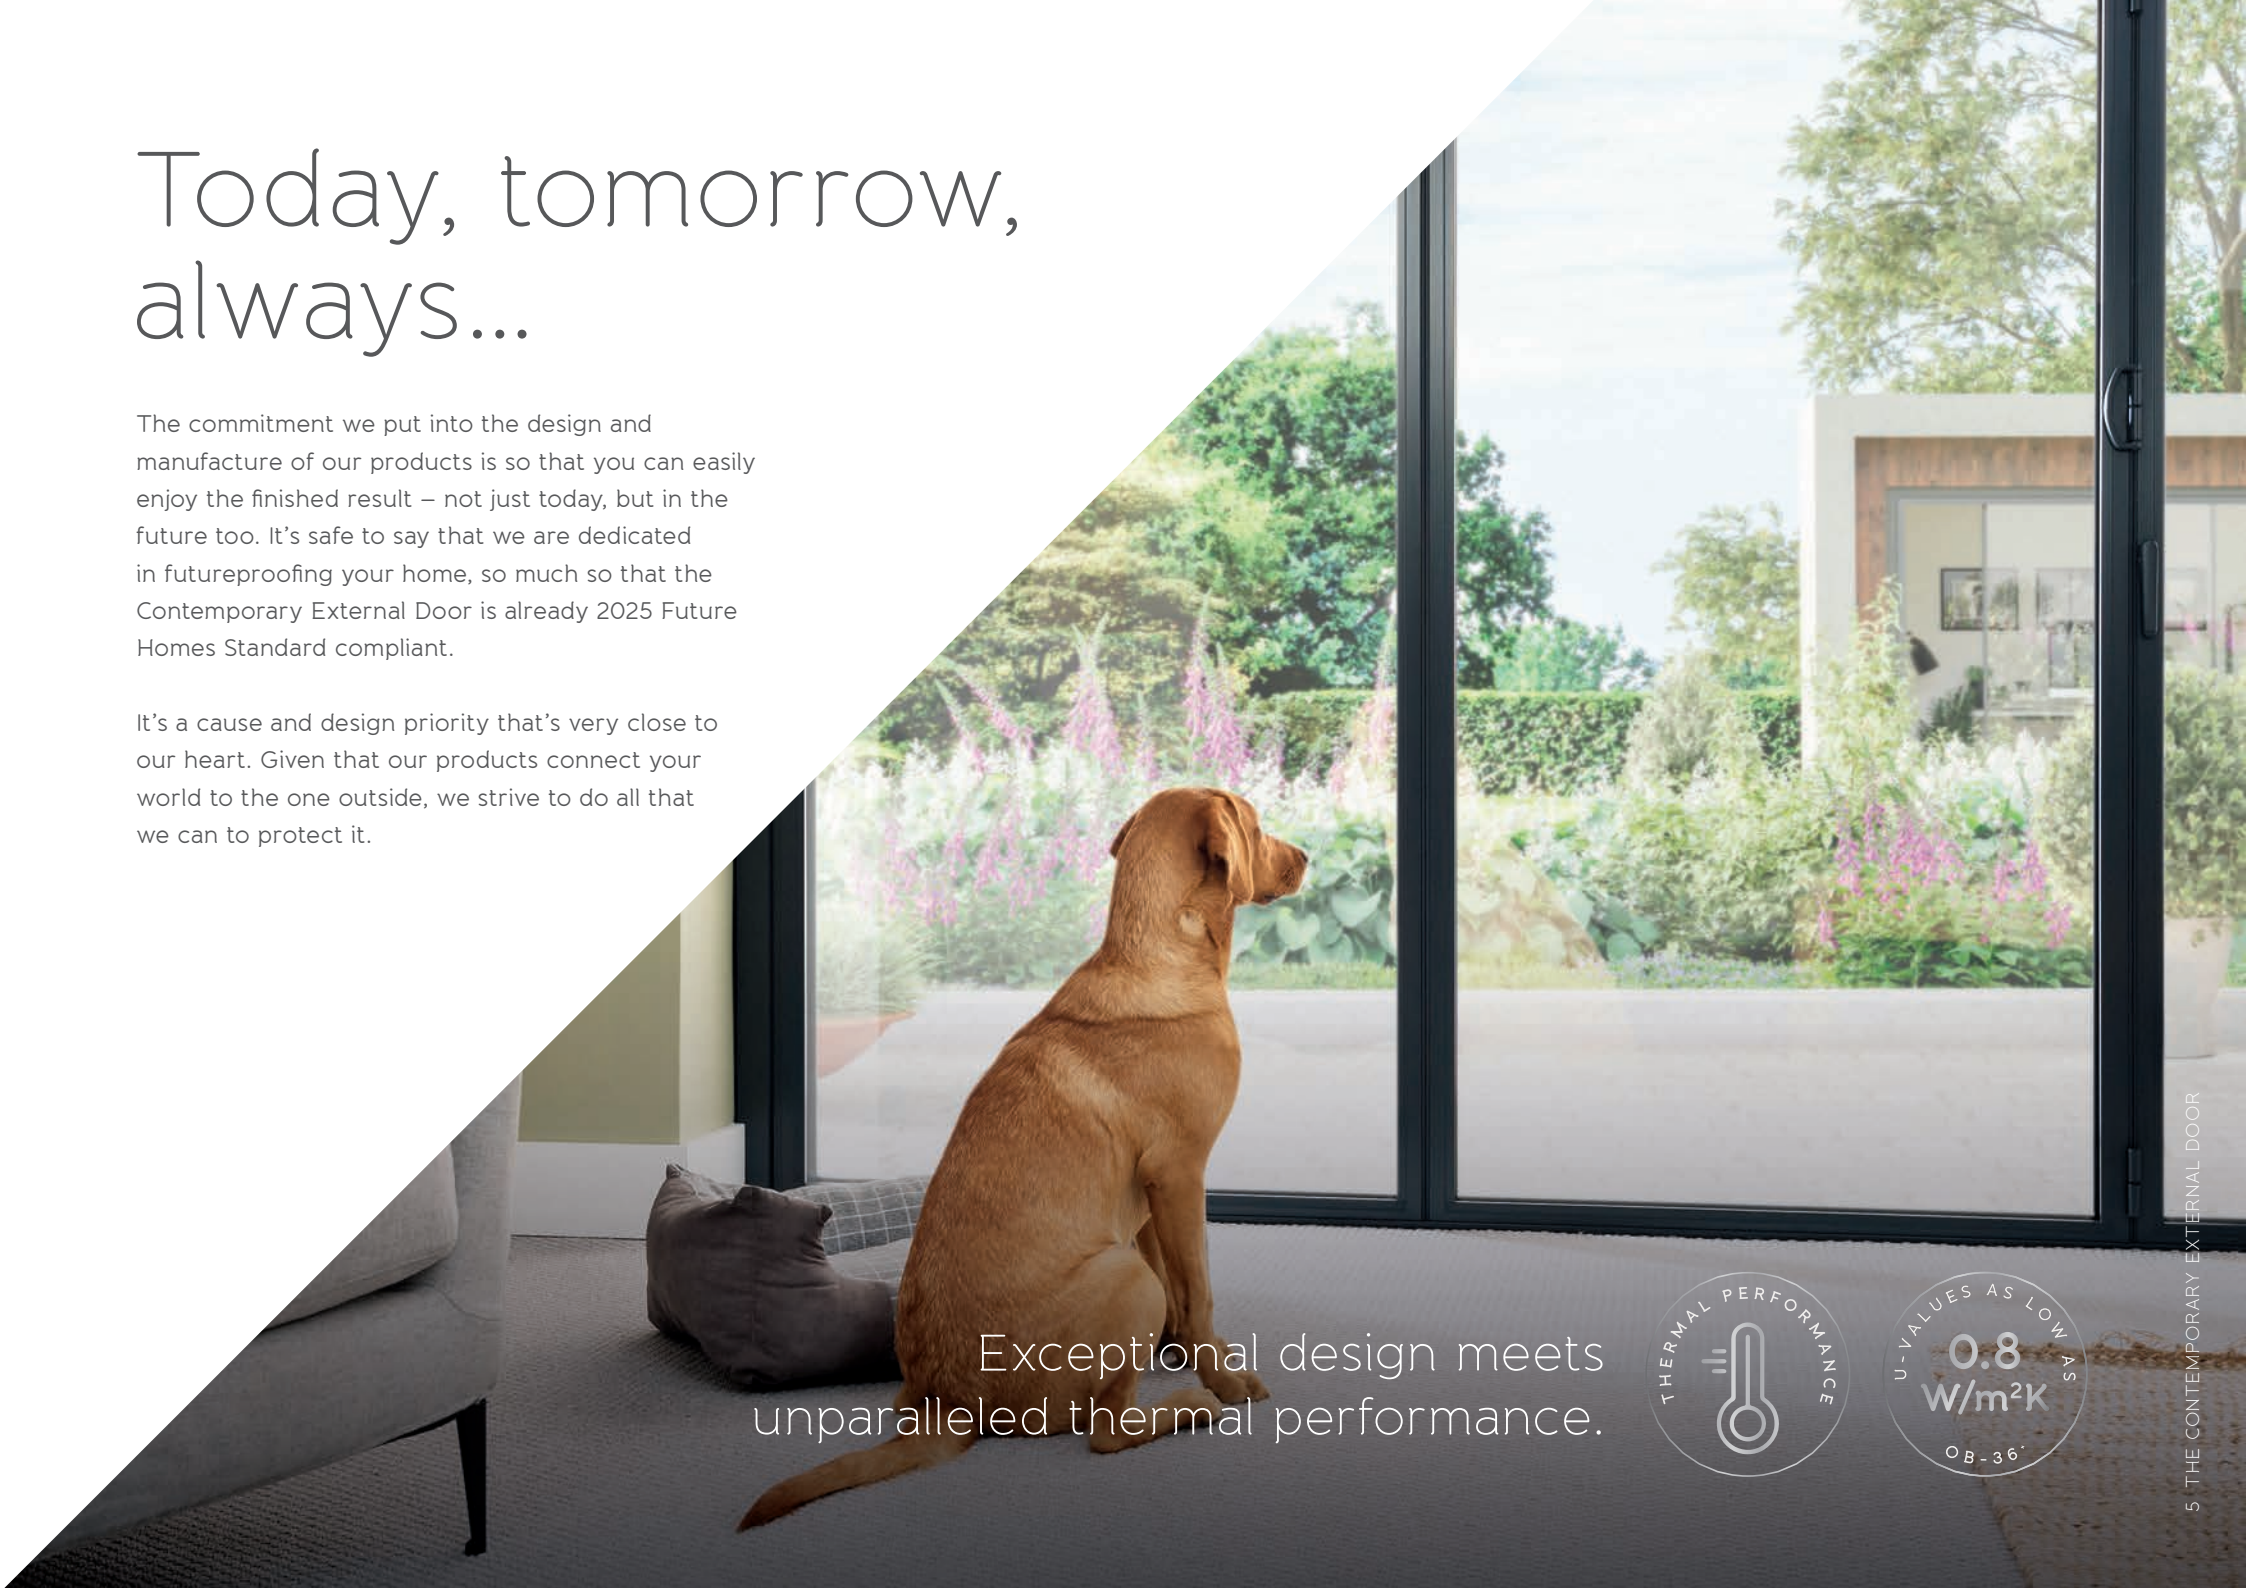
With sightlines of just 36mm, the Contemporary External Door delivers light where once was darkness.

Clean, simplistic and beautiful, the sheer engineering perfection allows a home to be truly opened up, seamlessly merging the inside and outside spaces. On top of offering lifestyle value like never before, the Contemporary External Door also delivers on safety, thermal efficiency, and security.

Today, tomorrow, always...

The commitment we put into the design and manufacture of our products is so that you can easily enjoy the finished result – not just today, but in the future too. It's safe to say that we are dedicated in futureproofing your home, so much so that the Contemporary External Door is already 2025 Future Homes Standard compliant.

It's a cause and design priority that's very close to our heart. Given that our products connect your world to the one outside, we strive to do all that we can to protect it.



Every detail, chosen by you...

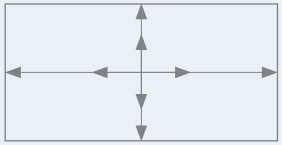
Precision made to your requirements, the journey to transform your home starts here.

Once you're set on Origin, visit origin-global.com and search for your local Installation Partner.

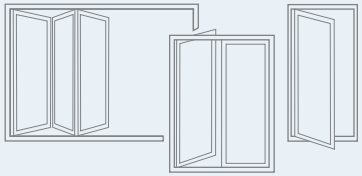
Your chosen Origin Partner will make the journey seamless and stress free. They will run through the different options with you – from size to how your doors open, what colour(s) you would like them to be, right down to the hinges. Once you have all the details ironed out, your Partner will let us know the best way to create your door for your home.

Installation Partners are independent companies who operate separately from Origin. However, in order for them to be able to provide the option of an Origin home to their customers, they will have been offered training with us. This means not only do they know our luxury products inside and out, but they can ensure that your Contemporary Door gets the professional and reliable installation it deserves. You're in good hands with your chosen Partner, who will look after everything.

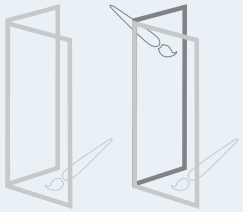


Overall size – your Installation Partner will survey to confirm your overall aperture size

Number of doors – individual doors can be between 600–1,200mm wide and up to 2,376mm high

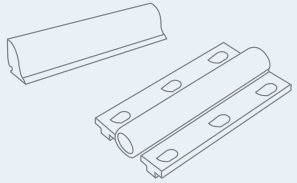


Configuration – specify the direction of the doors and how they open to ensure they work for your space

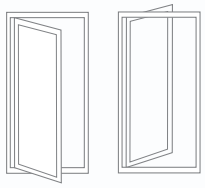


Single or dual colour – select a colour for your Doors, and whether you want the same hue inside and out or different

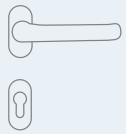
Threshold option – opt for a track choice that suits you and your installation. The choice is usually based on where the doors will be installed



Accessory finishes – opulence isn't opulence without the ability to have colour coordinated accessories



Open in or out – the doors can be hinged to open inwards or outwards, whatever is best for your space



Handle – choose from a stunning selection of handles as the sublime finishing touch

It’s your world to frame...

We have invested in every aspect of our products and services to ensure they’re fit for the future. Crafted exclusively at our state-of-the-art facility, we are proud to be UK based – which also helps us to control every part of our operation, ensuring consistent unparalleled quality every time.

It’s all about the ‘wow’ factor – we create products which can take your breath away and that you’ll never get bored of looking through. You have just 36mm of frame to colour, however, with 150+ RAL colours available, that’s quite a choice to make. If you’d like your frame colour internally to be different to the one on show externally, that is, of course, no problem.

Even the powder coating finish is flawless. Stunning to look at yet exceptionally hardwearing, this high-quality finish is just one of the reasons why the Contemporary External Door is guaranteed for up to 20-years.

MANUFACTURED IN THE UK

150 RAL COLOURS

Surpassing the standard...

When we see an accreditation, we don't just consider how can we achieve that, but rather how can we exceed it.

The Contemporary External Door complies to and exceeds required security accreditations, including PAS 24:2022. With such large expanses of glass supported by our frames, we know that every element of security counts. It's integral to everything that we do, and a priority of our in-house R & D department's design.

Of course, safety is also paramount, so your door will feature finger safe gaskets, magnetic catches and optional door restrictors to keep even the tiniest of fingers safe.

Exquisite handle choices...

Choosing the right hardware is important. On top of it being a design focal point of the door, it's the part you'll be interacting with most. Therefore, you need the reassurance it can do its job well for both protecting you, and opening up your world.

A joy to the senses, every handle option on offer has been meticulously designed to both look and feel good, as well as giving an overwhelming sense of quality and security.

A true statement in design, it's guaranteed to offer the definitive pièce de résistance.
